

## Our Vision and Mission

### Vision

To become the first choice company to partner with in the diesel generator and the power solutions industry.

To provide world class power generation products, solutions and services at competitive market based pricing.

### Mission

To establish long term relationships with key stakeholders and to create customer value through strong solutions offerings.

To provide top-quality and cost effective power generation solutions and services.

## PowerStep Power Solutions

PowerStep is a subsidiary of MicroStep South Africa, who in turn are a subsidiary of the MicroStep Group.

MicroStep, who are known for their range in modern CNC machines, is a global leader and manufacturer of plasma, oxyfuel, laser and water-jet cutting systems and are world leaders in Plasma Cutting Technology.

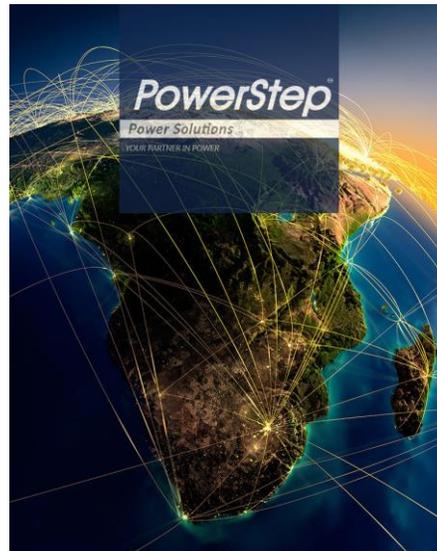

The PowerStep subsidiary was born out of a need by MicroStep South Africa to package Plasma Cutting Machines, with diesel generator sets for the African continent specifically as there is a lack of reliable power.

## Our Products

Our product range starts at 7,5 kVA to 2250 kVA (Prime Power Rated), and is available in open, silent and containerized solutions.

PowerStep's "PowerTel" product is a variable speed DC output solution for the Telecoms Industry.

**We ship Africa wide**

## Summary

We are living in a day and time where no company can afford any loss of revenue due to power failures affects turnover, profits and productivity.

Development took place much faster than expected last 5 years and electricity networks were not maintained or planned for future demand.

We can fulfill a need in the market by offering a complete solution. A Team focused involvement ensures that quality products and services are offered.

More than 25 years knowledge of generators ensures that the correct generator is offered either for standby or prime power needs

## Key Offerings

PowerStep is a brand orientated company, providing quality OEM engine, alternator and control brands within its range of products, to blue chip companies, government organizations and all end-customers requiring generator power.

Our products are proudly British and hence are designed and manufactured in the United Kingdom, using components sourced solely from the United Kingdom and Europe. As an ethical company, the belief will be in setting high standards in terms of service and customer support.

**Industries we serve:**

**Banking, Commercial, Public Sector, Telecoms, Construction**

We offer turnkey solutions which include, generator inspections and repairs, maintenance programs and installation of generators, as well as diesel refuelling.
